*15 years warranty

Every bed contains electronic potential therapeutic device.

High-Tech Anion pillow with far infrared

Male : 11.5 x 36 x 58 cm
Female : 9 x 36 x 58 cm

Advantages of Millennium Relaxed Bed

- 1. Decrease the interference :**
To avoid turning over or get up action to affect the other's sleep.
- 2. Do not get too hard to get up or stand up :**
General memory foam's sticky characteristic may tend to make the body get more difficulties as turn over or get up. As the muscle over reaction, it will cause sleep sensitivity. Bayer high-tech viscoelastic foam could make the body's muscle and spine to achieve balance without pressure even if the body moves, the foam will immediately fill the gap to support the body.
- 3. Body and the mattress into one :**
As the body and foam contact, it will release and balance the pressure immediately. Also, it will support and distribute the pressure at the same time. (because of the constant temperature characteristics) The general foam usually needs to wait until the body and the foam contact for a while to reach the efficacy.
- 4. Stabilize & Protect the spine :**
The spine is the body of the central nervous system. All the nerves are through the spine to the body to transfer signals to the organs. As sleep, the foam can produce a delicate balance of the body, the spine and muscle can get a moderate rest, so that the pressure of foam will be completely relaxed.
- 5. Do not deformed & collapse :**
After a long period of time to prove, Bayer's viscoelastic foam has sufficient body strength and tensile strength. (with test report) It can be used for a long time of compression, and the deformation, size issues will not be happened.
