

Innovative technology by Bayer – Viscoelastic Foam Meet the demand for sleep comfortable

The innovative technology by Bayer is a highly breathable & released material. Itself has a flame retardant, permeability, supportive, clothing, pressure releasing, and constant temperature characteristics. (It will not become soft or hard with the humidity.) It is the top item of the health sleep. The viscoelastic foam has unique physical characteristics, it can also be widely used in bedding and medical related products, such as support mats, mattresses, pillows, and the application of the wheelchair or medical beds. (Especially for burns patients) The viscoelastic foam could redistribution of weight and surface pressure, reducing the pressure between the skin and bones that caused by excessive compression of the nervous system, such as the heel, elbow, and the back of the head.

Characteristic of the mattress :

- The perforated structure is breathable.
- Fully release and dispersion the pressure.
- Volatile organic compounds meets the regulation of CE.
- Flame-retarding.
- Constant temperature : 5 ~ 40°C

Structured 4 layer design with patent :

1. Absorb layer
2. Release layer
3. Auxiliary support layer
4. Complete support layer.

The mattress contains far infrared and the mineral powder of anion. Every layer is with different density. Designed and manufacture d by ergonomic support.

Millennium Relaxed Bed with Oxygen Comparison with other high-end famous brands

Category	Pressure Distribution	Functional Difference
Millennium Relaxed Mattress	Maximum Pressure: 36Hg Average Pressure: 20.15 Hg 	Ergonomic, relieved average distribution of lumbar support, complete balance and relaxation, no reverse tension, does not compress nerve & microvascular, and does not interfere with pillow lover's sleep
Space Memory Pillow \ Latex Pillow		Spin bending, blood pressure, easily to lead blood circulation not smooth , soreness happened, hot & not breathable, neck pressure, muscle nerve can't diastolic.
Poket-Spring Mattress		Neck and neck vacant, support can not be evenly distributed, easily lead to autonomic nervous disorders.

Millennium Potential Therapeutic Device

Millennium electric potential therapy device

It can change the distribution of negative ions as well as cation in human's body and release your headache, chronic constipation, stiff shoulder.

Potential Therapeutic Device

Product Weight : 3 Kg
Fixed Voltage : AC 110 V
Host Size : 41 x 22 x 12 cm

The function and theory of electric potential therapy

Change distribution of positive ions and negative ions in human's body through electric potential. By doing so, it can change the distribution of polarity in human's body. It is also commonly known as electricity capacity therapy.

The effect of electric potential therapy device

Through changing the distribution of electric charge in user's body, it can release your headache, chronic constipation, stiff shoulder.

The structure of electric potential therapy device

This device has current-to-voltage converter, fuse wire, rectifier, and insulation cloth. Its potential is around 3000. Besides, we use guard wire to limit its output current.

Structure Patent of potential therapeutic device

CE approved certificate

TFDA approved sales licence for medical device #6231174188

TFDA approved certificate for medical device #001790/#1056041589
